Review Type (e.g., code, usability, design, other): Design

Scope:

Artifact Reviewed:

- Harvesting Tab on the website.

Review Objectives:

- Make sure the outline for the Harvesting tab concept looks good.

Methodology:

Approach Taken (e.g., execute, inspect, observe): Observed the page layout of the Harvesting tab and looked at the design of the wireframe

Evaluation Criteria (e.g., expected behavior, best practices, heuristic evaluation): It should match the design of the wireframe.

Coverage / Limitations (e.g., test login only, ignore database integration): Ignore submitting form. Looking only at layout of design.

Findings

Strengths:

- The design of the page is simple so it is not confusing.
- The form fields of the harvesting tab make it so a hunter knows what fields to fill out.

Issues / Defects:

Description of Issue	Severity (Low/Med/High)	Evidence / Example	Suggested Fix
Some form fields are a bit vague in what it means.	Low	Bear Management field could use some clarification on what it means.	Add mouse-over for names to show a brief

			description of what it is.
Checkbox for Bait was far away from the form name	Med	See image below for the Bait field.	Wrap the text-box to the field name and alter the distance.
